

ERNESTO NÚÑEZ MARRERO

SENIOR FULL-STACK & CLOUD ENGINEER

enm2071@gmail.com | +1 829-335-0738 | Santo Domingo, Dominican Republic

PROFESSIONAL SUMMARY

Senior Full-Stack and Cloud Engineer with 8+ years of experience building secure, scalable web, mobile, desktop, and payment platforms. Deep expertise in React, Next.js, TypeScript, Node.js, Python, GraphQL, and AWS cloud-native architecture, with hands-on experience across serverless, containerized, event-driven, and microservice systems. Skilled in AWS Lambda, Cognito, Amplify, AppSync, API Gateway, S3, CloudFront, ECS, EC2, IAM, VPC, Route 53, CloudWatch, and DynamoDB, as well as Docker, Kubernetes, and CI/CD. Known for technical ownership, clean architecture, performance optimization, production reliability, and strong cross-functional leadership.

TECHNICAL EXPERTISE

Frontend: React, Next.js, TypeScript, JavaScript, React Native, Vue.js, Redux, Material UI, Tailwind CSS, HTML5, CSS3

Backend & APIs: Node.js, Express.js, Python, Flask, Django, Ruby on Rails, .NET/C#, GraphQL, Apollo, REST, microservices

AWS & Cloud: Lambda, Cognito, Amplify, AppSync, API Gateway, S3, CloudFront, ECS, EC2, IAM, VPC, Route 53, CloudWatch, DynamoDB, Elastic Beanstalk

Containers & DevOps: Docker, Kubernetes, GitHub Actions, GitLab CI/CD, CodeBuild, trunk-based development, Vercel, automated deployments

Data: PostgreSQL, MySQL, MariaDB, SQL Server, MongoDB, DynamoDB, Redis, Firebase

Quality & Security: Jest, pytest, unit/integration/contract testing, Auth0, JWT, RBAC, secure API design, observability, code reviews

Payments & Integrations: Stripe, 3DS, PayPal, Nexio, Kount, Worldpay, Twilio, SendGrid, Microsoft Graph, Gmail API

PROFESSIONAL EXPERIENCE

Senior Full-Stack Developer | Thryv

Mar 2023 – Present

Lead feature delivery, integrations, reliability initiatives, and cloud-ready deployment practices for a high-volume payments ecosystem.

- Design and ship Next.js, React, TypeScript, Node.js, and Express features end to end, partnering with product, design, backend, QA, and DevOps teams.
- Lead secure payment and platform integrations involving Stripe, Twilio, fraud-prevention services, role-based access, health checks, and operational dashboards.
- Drive trunk-based CI/CD adoption with main as the source of truth and controlled promotion across Integration, Staging, and Production.
- Improve performance, observability, release predictability, and production reliability through testing, monitoring, root-cause analysis, and scalable service design.

Full-Stack Developer | Pulseara

Jan 2023 – Jan 2025

Built a multi-platform healthcare product with a serverless, event-driven AWS backend spanning web, desktop, and mobile.

- Designed authentication, payments, and data APIs with AWS Amplify, Cognito, Lambda, AppSync/GraphQL, DynamoDB, and Stripe.
- Delivered responsive React/Material UI experiences plus Electron desktop and Capacitor mobile applications with consistent cross-platform behavior.
- Implemented secure authentication, role-based access, schema-driven data models, monitoring, and automated testing for maintainability and scale.

Frontend Developer | Immunotec

Mar 2024 – Dec 2024

Owned frontend delivery for a high-throughput e-commerce and payments platform.

- Integrated 3DS, PayPal, and Nexio payment flows and Kount/Worldpay fraud services to strengthen SCA compliance and checkout resilience.
- Built secure React, Next.js, and TypeScript experiences with a .NET backend and Builder.io CMS, including RBAC and transaction dashboards.

Python Developer | BairesDev

Feb 2022 – Mar 2023

Led a Flask REST-to-GraphQL migration focused on API performance, security, and developer efficiency.

- Designed schemas and resolvers with pagination, batching, authentication, and authorization, reducing overfetching across critical services.
- Built unit, integration, and contract test suites with pytest and promoted GraphQL performance and maintainability practices across the team.

Senior Frontend Engineer | EPAM

Jul 2022 – Feb 2023

- Delivered reusable React/TypeScript modules and Node.js endpoints for enterprise applications, with accessibility, testing, and maintainability built in.
- Contributed to architecture discussions, code reviews, estimation, mentoring, and Agile delivery across cross-functional teams.

Frontend Software Engineer | Endurance International Group

Jun 2021 – Jun 2022

- Built React/TypeScript microfrontends for email, branding, landing-page, and automation products; improved UX, reliability, and code quality through testing and reviews.

EARLIER EXPERIENCE

React Developer | TieCode • Apr 2021 – Nov 2021 • React, Redux, TypeScript, .NET Core, C#, Dapper, reporting, user management, Google Maps, and data exports.

Mobile Developer | Softimatic • Jan 2021 – Jun 2021 • React Native reservation and payment application for premium banking customers, including multilingual UX and secure transactions.

Web & Mobile Developer | Ministry of Public Works and Communications • Feb 2018 – Jan 2021 • Nationwide toll-services platform using Vue.js, React, .NET, Entity Framework, and SQL Server across web and mobile.

EDUCATION

B.S. in Systems Engineering | Universidad Nacional Pedro Henríquez Ureña (UNPHU)

Oct 2014 – Jan 2020 | Santo Domingo, Dominican Republic

LANGUAGES

Spanish: Native | English: Professional proficiency
